RESPONSE TO RESTRICTION REQUIREMENT

Commissioner for Patents
P.O. Box 1450
Alexandria, VA 22313-1450

Sir:

In complete response to the Restriction Requirement mailed October 4, 2006,
Applicants hereby elect, with traverse, the claims of Group I, Claims 1-8, for further
prosecution in the subject application.

The claims were restricted into the following two groups:

- I. Claims 1-8, drawn to a method for distinguishing between biomolecule
crystals and non-biocrystals.
- II. Claims 9-24, drawn to a device adapted for distinguishing between
biomolecule crystals and non-biocrystals.

According to the MPEP § 803, a restriction between patentably distinct inventions is
proper only where there is a serious burden on the examiner to examine all the claims in a
single application. This is true even when appropriate reasons exist for a restriction
requirement.

In the present application, it is believed that because there is a close relationship among the subject matter to which the Examiner requires restriction and election, there would be no serious burden on the Examiner to examine all the claims at this time. For example, the methods and device claims of Groups I and II, respectively, are both drawn to technologies for distinguishing between biomolecule crystals and non-biocrystals. In fact, the Examiner has recognized that both groups are drawn to the same technology because her descriptions of the groups only differ by the use of the term "method" and "device."

In view of the above, it is respectfully requested that the restriction requirement be withdrawn.

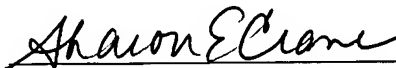

Applicants expressly reserve the right to file a divisional application covering the subject matter of the non-elected claims.

Applicants earnestly solicit favorable consideration of the above response and early passage to issue the present application. The Examiner is invited to contact the undersigned at the below-listed telephone number, in order to expedite prosecution.

Respectfully submitted,
BINGHAM MCCUTCHEN, LLP
